Noxious weeds	trifluralin	Phased out	HRAC K1	Triflurex 480 EC	EC	L5350	Adama South Africa (Pty) Ltd	480 g/L

Note: Not all listed targets cause problems in pecan nut orchards.

The provider cannot accept any liability for the accuracy of the list.

Growers are advised to read the product label before application, and apply products at their own risk.

Formulation notes: WS - Water soluble solution, EC - Emulsifiable concentrate, WG - Water-dispersible granule, WGD - Water dispersible granule, SL - Soluble concentrate, SC - Suspension Concentrate, SG - Water soluble granule.

High risk active ingredients have been categorized based on a) WHO 1A and 1B lists of highly hazardous active ingredients, b) EU PIC lists or c) the Rotterdam and Stockholm Conventions.

Banned actives should not be used where alternatives exist, and are internationally being phased out, usage is restricted and alternatives must be considered.

Restricted actives pose risks without many alternatives available. For this class, it is advised that mitigation programs are implemented. Highly restricted actives have implications per specific crop and country.

Alternatives should be implemented for phased out actives.

Monitored actives have related concerns and might become restricted or banned in the future.

PHI = Pre-harvest interval (withholding period). Time from spray or application up to harvest or handling of nut in husk - measured in days.

- No PHI applicable.
